I turn messy workflows — case-file search, invoice entry, missed calls, email triage — into software people actually click. **UI, API, and AWS included.** Five products shipped solo. Four live today.

STACK

- Python
- Django
- FastAPI
- LangChain / LangGraph
- RAG
- Groq
- Pinecone
- Twilio
- Celery
- Redis
- PostgreSQL
- Docker
- AWS EC2

FIVE PRODUCTS

Hospitality

Deskline — AI Voice Agents

Answers the hotel or restaurant phone, books a room or table, and logs the call into an ops console.
Result: Takes the missed front-desk call and writes the booking — with transcripts and analytics.
Django · Retell · Groq · AWS

Live →

Multi-agent

Autonomous AI Strategy Engine

One business question. Seven agents research in parallel and return a single strategy report.
Result: Turns weeks of tab-and-doc research into one report from 7 agents in a single run.
LangChain · Groq · Cohere · Pinecone · SSE

Live →

Legal Tech

Lexora — Legal AI Case Management

Find the clause in a 200-page PDF. Answers cite sources. Hearings stay in one workspace.
Result: Cuts case-file review from hours of re-reading to a cited answer in seconds.
Django · FastAPI · Pinecone · Groq · AWS

Live →

Document AI

Fieldline — Document Intelligence

Upload invoices and forms, extract fields, check them on the page, export JSON or CSV.
Result: Cuts invoice entry from retyping every field to extract, check, export.
PyMuPDF · Celery · Groq

Live →

Support

SupportAI — Inbox Automation

Shared support email becomes classified, prioritized, assigned tickets — with separate admin and agent views.
Result: Stops a shared inbox sitting unread for hours — mail arrives already assigned.
Django · IMAP · Groq

Live soon

How I work

- Solo from schema and UI through API, workers, and AWS deploy
- 2+ years production AI · Python Developer at Snakescript Solutions LLP (May 2024–Present)
- Typical reply in 1 day · live demos may take 20–40s on first load

Forward this. Then talk.
